

Title:

Mr

Forename:

Steven

Surname:

Watts

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Additional comments:

A lot of countries are looking to lower the frequency of radiation they produce due to safety regulations that state the dangers of such apparatus, their limits are well below the guidelines set by the UK. Myself and a lot of people are suffering because of the affects of ELF and I believe that it is wrong, both ethically and morally to subject people to this amount of radiation without consent or, indeed any notification. It is about time you respected the views of the British public and no longer use us as guinea pigs for experiments that have already been proven to cause harm to both humans and other animals.

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes there are PLENTY of reasons that have already been given by top scientists worldwide.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes there are PLENTY of reasons that have already been given by top scientists worldwide.
