

Title:

Mr

Forename:

Peter

Surname:

Mobley

Organisation:

Wednesbury Action for the Re-siting of Telephone Masts (W-A-R-T)

Email:

w-a-r-t@blueyonder.co.uk

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

I am not a technical person, but I do understand the conclusions of the hundreds, if not thousands, of research projects into this matter, which have been conducted by eminent scientists from all over the world over the past 50 years. There is already overwhelming evidence from Truly Independent research, that adverse health effects are becoming more widely found, even at emission levels well below the current guidelines.

It is acknowledged that the present ICNIRP standards are totally inadequate as they are only concerned with thermal effects of the radiation, and completely ignore the serious effects of non-thermal biological effects that this radiation produces.

It is vital for the health and well being of everyone that an immediate stop is made to any further masts installations and certainly no increase to current output power levels. This would be an absolute disaster.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:
