

Title:

Mr

Forename:

Ian

Surname:

Oliver

Representing:

Self

Organisation (if applicable):

Email:

nospam314@foxhill.co.uk

What do you want Ofcom to keep confidential?:

Keep nothing confidential

If you want part of your response kept confidential, which parts?:

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No. Copy management will restrict the choice of equipment and software that I can use.

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

No

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

No

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

No

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

I want to legitimately record HD content using my Linux based system and watch said content in any room of my house. Ensure that open systems such as Linux and mythtv can record and play the content as a basic minimum guarantee.

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :

No, it will add greatly to cost and complexity. Interoperability will also be greatly restricted with is highly undesirable.

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

No

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

Consumers have already bought, and are still buying, DVB-T equipment that will not receive the HD content. Soon, they will realise that they have been somewhat deceived and should have waited to buy DVB-T2 equipment. How will they feel if they buy this and then realise it won't work with all HD content as a content protection mechanism has belatedly come along?
