

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No it would not it would allow too much power to be in the hands of big american studios. That is all this is about they want us to pay for shifting which is something we can do for free now.

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

No I will take two weeks to bypass, hacks are far far smarter than the BBC and its an utter waste of time and money.

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

No I DO NOT

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

NO I DO NOT

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

No it would not as you would limit use to one set of equipment made by one group of people who would have total control and would want to charge for time shifting or platform shifting they want to take our rights away one bit at a time.

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :

Who are you trying to kid they will milk it for all its worth and charge as much as they can get away with.

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

No, again have you actually looked at this they just want to lock down the hardware as much as possible and remove all the features that we get for free now.

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

Yes that if this goes ahead that I and many others will no longer regard the BBC as impartial and I will get rid of my TV so I don't have to pay the license fee any more and will just get all my TV on the internet for free.

If the BBC wants to get in to bed with the Americans for the sake of short term profit then it will be the death of the BBC as a public body there is no way I am going to pay for the BBC to treat me like crap.
