

**Title:**

Mr

**Forename:**

Christopher

**Surname:**

Gadsby

**Representing:**

Self

**Organisation (if applicable):**

**Email:**

**What do you want Ofcom to keep confidential?:**

Keep nothing confidential

**If you want part of your response kept confidential, which parts?:**

**Ofcom may publish a response summary:**

Yes

**I confirm that I have read the declaration:**

Yes

**Ofcom should only publish this response after the consultation has ended:**

You may publish my response on receipt

**Additional comments:**

**Question 1: Do you consider that our proposed fee rates for licences in the aeronautical VHF frequencies are appropriate?:**

NO

**Question 2: In devising our revised proposals, have we identified all of the aeronautical uses of VHF communications frequencies which require a distinct approach to fee setting, as set out in tables 5 and 6?:**

**Question 3: Do you agree with our proposal not to charge any fees for Fire assignments?:**

**Question 4: Do you agree with our proposal to set a £75 fee for licences in any of the sporting frequencies?:**

**Question 5: Do you agree with our proposal to set an annual fee of £19,800 per ACARS or VDL assignment, with no variation related to the number of transmitters?:**

**Question 6: Do you consider that our proposed approach to phasing in fees for use of the aeronautical VHF communications channels are appropriate? If there are particular reasons why you consider that any user or group of users would need longer phasing-in periods, please provide any supporting evidence for us to consider. Specifically, do you have any evidence for us to consider that would support either of Options 1 and 2 for the highest proposed fee in this sector?:**

I am a member of the Darlton gliding club The proposal to charge £2800 for the use of an aviation frequency is wholly inappropriate for a club such as ours. We are non commercial, non profit making and our use of an aviation frequency is purely for safety reasons. Your proposals represent something like a 20% increase on annual membership just to pay for the use of this frequency. This will have an adverse effect on the gliding community in general as we are by no mean unusual as a club. I see no reason why safety should have to be compromised by not using the radio or why people should be forced to give up the sport for financial reasons (and some will have to given the cost of this proposal) for no additional benefit

As stated before - we are not a commercial operation we have no sources of income other than the members fees so any such increase will have a direct and personal effect on membership and participation

**Question 7: Do you have any further quantified information to contribute to the analysis of financial impacts of the proposed fees on particular spectrum users, as set out in Annex 5? We would like to publish all responses, but will respect the confidentiality of any material which is clearly marked as such.:**

**Question 8: Do you consider that our assessment of the impacts of our proposals has taken full account of relevant factors? If you consider that there is additional evidence that would indicate particular impacts we should take into account, we would be grateful if you could provide this.:**
