What do you want Ofcom to keep confidential?:

Keep nothing confidential

If you want part of your response kept confidential, which parts?:

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you consider that our proposed fee rates for licences in the aeronautical VHF frequencies are appropriate?:

no

Question 2: In devising our revised proposals, have we identified all of the aeronautical uses of VHF communications frequencies which require a distinct approach to fee setting, as set out in tables 5 and 6?:

Question 3: Do you agree with our proposal not to charge any fees for Fire assignments?:

yes

Question 4: Do you agree with our proposal to set a £75 fee for licences in any of the sporting frequencies?:

Question 5: Do you agree with our proposal to set an annual fee of £19,800 per ACARS or VDL assignment, with no variation related to the number of transmitters?:

Question 6: Do you consider that our proposed approach to phasing in fees for use of the aeronautical VHF communications channels are appropriate? If there are particular reasons why you consider that any user or group of users would need longer phasing-in periods, please provide any supporting evidence for us to consider. Specifically, do you have any evidence for us to consider that would support either of Options 1 and 2 for the highest proposed fee in this sector?:

the cost of £2800 is sheer robbery similar to the fees charged when the licencing act 2003 that transfered running from magistrates courts to local authorities, except yours is worse (£5 year to £280/year for a small club bar.)

We have about 6000 glider launches /year thus you will add 46p to each launch. That is 46p ontop of a total cost of £5.50 adding 8%.

This will cause small clubs to discontinue to have a radio on the airfield thus endangering safety as we often get contacted by the local air ambulance who wish to pass close to our site.

Question 7: Do you have any further quantified information to contribute to the analysis of financial impacts of the proposed fees on particular spectrum users, as set out in Annex 5? We would like to publish all responses, but will respect the confidentiality of any material which is clearly marked as such.:

Question 8: Do you consider that our assessment of the impacts of our proposals has taken full account of relevant factors? If you consider that there is additional evidence that would indicate particular impacts we should take into account, we would be grateful if you could provide this.:
