Question 1: To what extent do you consider that DTT, DSat, cable and IPTV are in competition with one another for subscribers of pay TV services ? either at present or in the future?:

Question 2: To what extent do you consider the Proposal is likely to deliver benefits to the consumer?:

I have strong concerns that removing Sky News 24 from the Free-to-air services, leaving only one 24 hour news service (BBC) would be detrimental to the quality and

service of news offered to UK viewers.

I have no objection to the other channels being removed from the free service.

Question 3: To what extent do you consider that there is scope for sustainable competition in pay TV on the DTT platform and, more broadly, across all pay TV platforms?:

Question 4: What are likely to be the key aspects of competition between providers of retail pay TV services on the DTT platform? E.g. what is the role of premium sports and movies content?:

Question 5: Do you consider that if Sky were to become the only provider of pay TV on the DTT platform it would be likely to have a significant detrimental effect on competition in the long term? How might this affect the development of other platforms for the delivery of pay TV services?:

Question 6: To what extent, if at all, do you consider that the Proposal would be likely to lead to any of the public policy concerns outlined at Section 4?:

Question 7: Specifically, to what extent do you consider that the Proposal would be likely to lead to consumer confusion?:

Question 8: To what extent do you consider that it is beneficial for consumers to be able to obtain Sky and existing DTT pay TV content without having to purchase separate STBs?:

Question 9: Do you consider that the Proposal might lead to any additional public policy concerns:

Yes - seen answer above.

Question 10: If Sky becoming the only provider of pay TV services on the DTT platform were likely to have a significant detrimental effect on competition, do you consider that it is possible to address this through a set of additional conditions and/or directions? If so, what form should those conditions/directions take?:
