Question 1: When do you consider it would be timely and efficient for next generation access investment to take place in the UK?:

Question 2: Do you agree with the principles outlined for regulating next generation access?:

Question 3: How should Ofcom reflect risk in regulated access terms?:

Question 4: Do you agree with the need for both passive and active access remedies to promote competition?:

Question 5: Do you consider there to be a role of direct regulatory or public policy intervention to create artificial incentives for earlier investment in next generation access?:

Additional comments:

It is important not to get too hung up on the headline connection speed to each home. An end user's experience with an uncontended ADSL+ connection may well be better than a 100Mbps fibre connection constrained by the 50:1 contention ratio currently used for domestic ADSL.
