

**Question 1: Do you agree with our proposal to permit the licence-exempt use of BMA devices in specific spectrum bands using UWB technology?:**

**Question 2: Do you agree with our proposal to exempt users of HDFSS operating with e.i.r.p. no greater than 50 dBW in the 27.50-27.8185 GHz, 28.4585-28.8265 GHz and 29.4625-30 GHz bands from the need to possess a WT licence?:**

**Question 3: Do you agree with our proposal to allow an increase in power for Meter Reading & Asset Tracking licence-exempt devices in the 169.4 - 169.475 MHz band to 500mW?:**

**Question 4: Do you have any comments on our proposals to align with the draft Commission Decision relating to SRDs?:**

I strongly support this proposal on the basis that it would allow the use of frequency 868.2 MHz at 10MW for use in the Flarm SRD anti-collision device for gliders. I have been involved in an evaluation of this device at the Scottish Gliding Union, Portmoak Airfield, Kinross-shire over the past summer and our findings are that widespread use of this device will have a considerable benefit for flight safety in gliders.

**Question 5: Do you have any comments on our proposal to simplify the LMSS equipment listings in the Exemption Regulations and IR2016?:**

**Additional comments:**

I would like to express my appreciation for the constructive attitude that Ofcom have shown towards representations from the gliding community regarding the use of the Flarm SRD in gliding
