Public Consultation in UK as of June 18th, 2007
UK Broadband application for licence variation

Dear Mr. Sonke,

Inquam Broadband GmbH appreciates the opportunity to provide comments on OFCOM's consultation regarding UK Broadband's application for licence variation.

We hope that our responses provide a helpful contribution for your further proceedings. Please feel free to contact me either by phone at +49 221 5000-201 or by email andrzej.cwik@inquam-broadband.de with any questions regarding the above.

Kind regards,
Inquam Broadband GmbH

Dr. Andrzej Cwik
CTO

Inquam Broadband Responses

Inquam Broadband Responses

Inquam Broadband supports various spectrum harmonisation activities across Europe, especially those ambitions regarding technology and service neutrality. Inquam Broadband feels very confident that technology and service neutrality are major keys for efficient usage of spectrum.

Further, Inquam Broadband strongly believes that competition will benefit from ongoing spectrum liberalisation which will lead to more economic efficiencies. Finally, the customer will benefit from more competition due to lower price and high quality service offerings as well as from a greater range of network operators.

From there, Inquam Broadband is in favour of removing any service or application restrictions in the 3.5 GHz band, including those within already granted licences. In addition, Inquam Broadband also agrees on alignment of permitted power levels according to the referred ECC Recommendations for this band.

In summary, Inquam Broadband supports a rapid adaptation of UK Broadband's licence conditions.
