

**MCA response to OFCOM Consultation on Higher power limits for licence exempt devices  
(at 2.4 GHz and the 5 GHz band)**

- 1** The MCA has read the consultation document and its associated Consultant's report with interest.
- 2** The major interest of the MCA is any possible impact on the maritime radionavigation frequency allocation in the band between 5470 and 5650 MHz.
- 3** We have concluded that such impact is likely to be minimal.
- 4** With regard to the consultation questions – we have concluded that no detailed response is relevant.

As purely an editorial matter we note that at Paragraph 3.43 on Page 14 the word "Trafficking" should be replaced with "Traffic" and this also applies to Page 42 in the Glossary.
