

David Barber I.Eng. MIET G8OQW

Question 1

Do stakeholders agree with the proposals for the award of licences in the 10GHz, 28GHz and 32GHz bands in 2007?

Answer 1: No (10GHz)

With reference to the range 10.475 – 10.500GHz.

It seems clear that your advice, your research or both are flawed with respect to this frequency range. This is an internationally agreed Amateur Satellite designation within which there are various ongoing projects. Furthermore your suggested specifications for the levels of out of band emissions would appear to be potentially detrimental to the adjacent Amateur allocations.

Question 2

Do stakeholders agree with the proposal to include in the award of the 32GHz band that portion of the band that has been open since 2003 for point-to-point applications?

Answer 2: N/A

Question 3

Do stakeholders agree with the proposal to defer the release of the 40GHz band and review the position in two years' time?

Answer 3: N/A

Question 4

Do stakeholders have any other comments on the contents of this document?

Answer 4: N/A
