About this data: Mobile coverage, local and unitary authority area

To create our <u>Connected Nations 2021 report</u>, Ofcom collected and analysed data from all the mobile network operators. This file contains mobile network coverage information from the operators. Further information is available in <u>our methodology</u>.

The coverage availability was collected as a snapshot in September 2021.

Due to variations in mobile performance over time, the file should not be regarded as a definitive and fixed view of the UK's mobile infrastructure. However, the information provided in this file may be useful in identifying variations in mobile performance by geography.

If you have any questions or feedback on the data please contact us at <u>open.data@ofcom.org.uk</u>.

We are providing this data on an open basis via the <u>Open Government Licence</u>, which gives users various freedoms about how they choose to use the data, subject to conditions.

The files are provided as a Comma Separated Values file, with double quote (") text delimiters where applicable.

Revision note

[15 Feb 2022] - Correction of the label for the fields 4G_prem_in_X, Voice_prem_in_X and Data_prem_in_X, with 'geographic (indoor)' replaced by 'premises (indoor)'.

Signal thresholds

We use the following signal strength thresholds when estimating coverage:

Service		Metric	Outdoor	Indoor and in-car
2G		RxLev	-81dBm	-71dBm
3G		RSCP CPiCH	-100dBm	-90dBm
4G Voice		RSRP	-105dBm	-95dBm
4G Data		RSRP	-115dBm	-105dBm
