

About this data: Mobile coverage UK and Nations

To create our [Connected Nations Summer 2023 update](#), Ofcom collected and analysed data from the four mobile network operators (MNOs). This file provides mobile coverage information for the UK and Nations.

The data was collected as a snapshot in April 2023. [Our methodology](#) provides details of our approach to collecting and analysing mobile coverage data.

This file contains a subset of the data points for April 2023 that are provided on page 14 of the [Connected Nations Summer 2023 Interactive report](#) and the corresponding April 2023 data for each of the four MNOs.

Due to variations in mobile performance over time, the file should not be regarded as a definitive and fixed view of the UK's mobile infrastructure. However, the information provided in this file may be useful in identifying variations in mobile performance by geography.

If you have any questions or feedback on the data, please contact us at open.data@ofcom.org.uk.

We are providing this data on an open basis via the [Open Government Licence](#), which gives users various freedoms about how they choose to use the data, subject to conditions.

The files are provided as a Comma Separated Values file, with double quote (") text delimiters where applicable.

Coverage availability

File name: mobile_coverage_UK_and_Nations_202304_r01.csv

Total records in file: 1 header row, 735 data rows

File size on disk: 51 KB
